

## The Skills of the future ... that Guarantee True Success!

The world is changing ... and changing fast! For many years, most people were living in the Agricultural Age, on farms working the land, and using the skills that had been handed down to them for generations.

In the early 1900s, as Ford, Carnegie, Vanderbilt, Rockefeller, and Edison led the World into the Industrial and Mechanical Age, so it was a necessity for many to develop a completely new set of skills to survive as the World changed.

In the 1970s and 80s, as the World moved into the Technology Age, pioneers like Bill Gates and Steve Jobs and many others shaped so many aspects of today's World.

Most recently we have been going through the Information Age, which has led to most people having so much information and choices to make – from the minute they get up in the morning until they go to bed. These can be as fundamental as deciding what to wear or where to eat – or as significant as deciding whose name to put on a ballot when voting for a President, or as a CEO making decisions that affect thousands of people.

For many people, every day they are becoming overwhelmed, anxious, stressed and are challenged in some areas of their lives. Some are unable to create their ideal relationships or experience harmony with their families. Others have just run out of tools and don't know how to relax and unwind. They aren't happy with their career and can't focus on what they are doing, are unclear about their vision and are unable to fulfill their potential and purpose.

There is a lot of uncertainty today for many people. What worked yesterday, doesn't work anymore. In fact, the only thing that is constant is change ... and the ego and mind hate change!

Many are simply not enjoying their life - it is not turning out to be what they "expected".

In fact, a recent study revealed that the most important thing that most people are looking for is ... Peace of Mind.

As the Information Age ends, we are moving into the Consciousness Age, or Golden Age as some call it, and ***a new set of skills are necessary for those who are ambitious and committed to fulfilling their potential, mastering themselves, and getting results in all areas!***

The five skills to develop that guarantee success now and in the future are:

### **Awareness:**

The more a person is self-aware, the more they direct and live their life deliberately.

The way to be more aware and conscious, is to develop the skill to quiet the mind. This results in being more aligned, having greater well-being, and being able to tap into more intuitive guidance and inner wisdom.

**Attention:**

Attention creates reality. The more attention a person has on something, the more real it becomes, whether it be limiting or empowering. The more a person manages their attention, the more they create their life deliberately.

For a person who wishes to create their reality deliberately, managing their attention is the most important skill to develop in the future.

**Beliefs:**

Beliefs create reality. Whatever we believe is what we create / attract / experience. The mind/ego defends beliefs that were - at some point - effective. Since change is uncomfortable, the ego holds on to what it knows, and resists being in the unknown, however much holding on to the beliefs is limiting/damaging/stressful!

By exploring limiting beliefs and sabotage patterns, a person becomes aware of them and can develop the simple skills necessary to release them from the physiology.

**Identities:**

The purpose of creating identities – how and why we do this – understanding why we behave differently with different people.

The more a person develops the skill to identify and then manage their identities, the more they get the results they want when dealing with others.

**Intention:**

The more a person lives their life from their intention and how it feels, the more they are aligned with themselves, live in integrity and can fulfill more of their potential.

**These are the 5 components of the Self Discovery Life Mastery Process to develop to guarantee True Success in life.**

You've had moments in your life when you were "In the Zone", "In the Flow", "Everything worked like Magic!", right? What if that were "normal" ... what if it you created whatever you wanted easily and effortless? What if your life was a life of miracles? Do you believe that is possible?

Believe it! There are people who live their life this way.

For the person who can feel that these are the skills they are committed to developing, the Self Discovery Life Mastery Process is a very simple strategy that supports a person to master their life!

*There are little known ways to rapidly accelerate developing these abilities ...*

***The Self Discovery Life Mastery Process is the most direct, Evolutionary and Revolutionary Strategy – currently available – to rapidly accelerate Self and Life Mastery!***
